INSTRUCTIONS: Please provide the following information. You must respond to each question. If a question is not applicable or your answer is “none,” please respond accordingly. Incomplete applications will be returned without review.

FEES: The Applicant must submit fifty percent (50%) of the total estimated fee at the time of submission of this Application. The Application will not be accepted without this initial payment. Applicant must submit any remainder of the balance due no later than October 15 of this year. Please use the fee scheduled appended to this Application to determine the amounts due.

I. Applicant

Individual Partnership Corporation Government Entity Other: _____

Name:

Attention:

Physical Address:

Mailing Address (if different):

Email:

Phone:

II. Production Well Information

1. Please attach to this application:
 - a. a map showing the location with corresponding well identification number of each existing and proposed new well for which you are seeking a permit to export water for reasonable and beneficial use outside of MAGSA’s boundaries; and
 - b. The well completion reports for each well for which you are seeking a permit.
2. Does this Application apply to more than one well?

If so, attach and identify as “**Attachment A**” additional pages necessary to provide the following information for each well.

3. Well No.:
4. Existing well New Well
5. Type of well:
6. Address of Well Owner (if different from Applicant):
7. Telephone Number of Well Owner (if different from Applicant):
8. Email Address of Well Owner (if different from Applicant):
9. Address of Well Site:
10. Latitude:
11. Longitude:
12. Inside Diameter Casing:
13. Total Depth:
14. Pump Description:
15. Maximum Extraction Rate(s):
16. Static Water Elevation:
17. Proposed Monthly Extraction Rate:
18. The Time Periods in which Each Well is Proposed for Operation:
19. Total Proposed Amount of Water to be Exported During the Permit Period:
20. Proposed Total Production During the Next Twelve Months:

III. Place of Use

1. Identify the location(s) outside of the MAGSA boundary to which you intend to export water.
2. Provide a detailed description of the intended use for the exported water at each location. If the intended use is commercial or industrial, describe the type of business, number of employees, type of product produced or sold, etc. If the intended use is for new development, include details of the intended construction (including start date). If the water is intended to serve multiple locations, include details regarding the number of parcels and service connections the water will serve.
3. Describe any other water supply available at the location of proposed use of the exported water (e.g., other available municipal lines, canals, etc.).

IV. Environmental Impact:

1. Does the individual well or the entire water system collectively, have the potential to

cause adverse impacts? Please explain and provide all supporting documentation.

2. Will the individual well, or the entire water system collectively, adversely affect reasonable and beneficial uses of groundwater, interfere with surface flows, or cause other adverse changes to the physical environment? Please explain and provide all supporting documentation.
3. Does the well or the entire water system collectively, have the potential to adversely impact water-dependent ecosystems or threatened or endangered species? Please explain and provide all supporting documentation.
4. Describe any proposed mitigation measures designed to offset any adverse environmental effects of the extraction.

V. Exemptions

1. Is this Application for a permit to extract two-acre feet or less of groundwater per year for domestic use only?
2. Is the well and/or subject water system subject to a CEQA exemption (e.g., Pub. Resources Code, § 21080)?
3. Is the water system otherwise exempt from MAGSA permit authority? Explain.

VI. Other Information

Is there additional information MAGSA should consider? Explain.
